DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 1 and 3-20 have been renumbered 1-19. There is no originally filed claim 2 because the filed claims identify claim 2 as canceled. There is no preliminary amendment in the application file.

Specification

2. The disclosure is objected to because of the following informalities: The application number in line 29 of page 10 should be updated to include its current status.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1-19 are indefinite because it is unclear whether a method or apparatus is being claimed. Conventionally, the "plant" recited in claims 1 and 13 refer to an apparatus or system, however claim 1 and especially claim 13 recite mostly method steps that do not set forth

Art Unit: 1724

any structural limitations. Recitation of both apparatus and method of using that apparatus in the same claim renders it indefinite since the claim is not sufficiently precise to provide competitors with accurate determination of "metes and bounds" of protection involved (See *IPXL Holdings LLC v. Amazon.com Inc.*, 77 USPQ2d 1140). Claims 2-12 and 14-19 are rejected for depending from a rejected parent claim.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed on the attached PTO-892 form disclose acid gas absorption systems.
